Lustre

Fujicolour Crystal Archive DPII Lustre is a silver halide colour paper that is extremely popular within the photographic industry. This paper combines the best of both matt and gloss papers, providing vivid colours and reduced glare.

Metallic Pearl

Fujicolor Crystal Archive Digital Pearl is a silver halide colour paper with embedded pear-like particles which create a distinct iridescent appearance. This high-gloss paper produces vibrant colours, deep blacks and purer highlights, making it perfect for both colour and monochrome printing.

Velvet

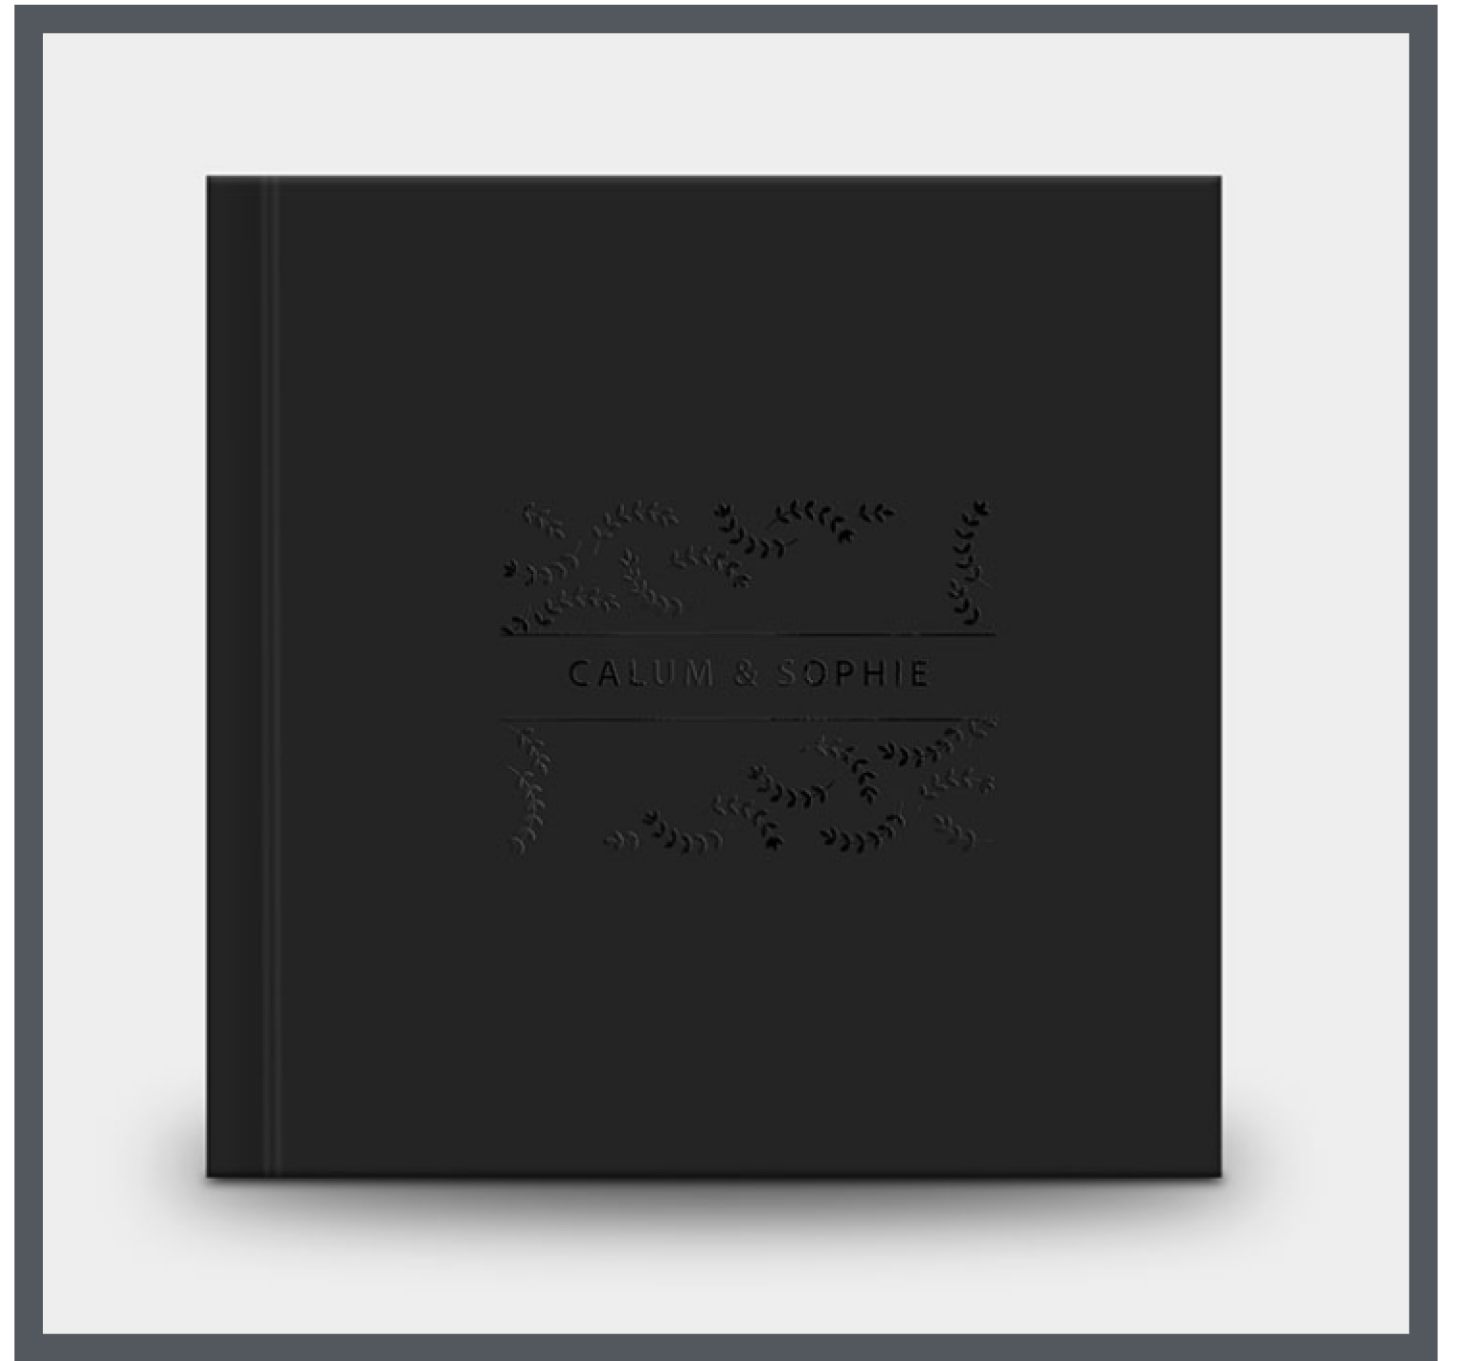

Fujicolour Crystal Archive Professional Velvet is a dead matt photographic paper, perfect for both monochrome and colour photography. The velvet texture diffuses light remarkably well, keeping light reflection to a minimum even under high lighting conditions

PRINT FINISHES

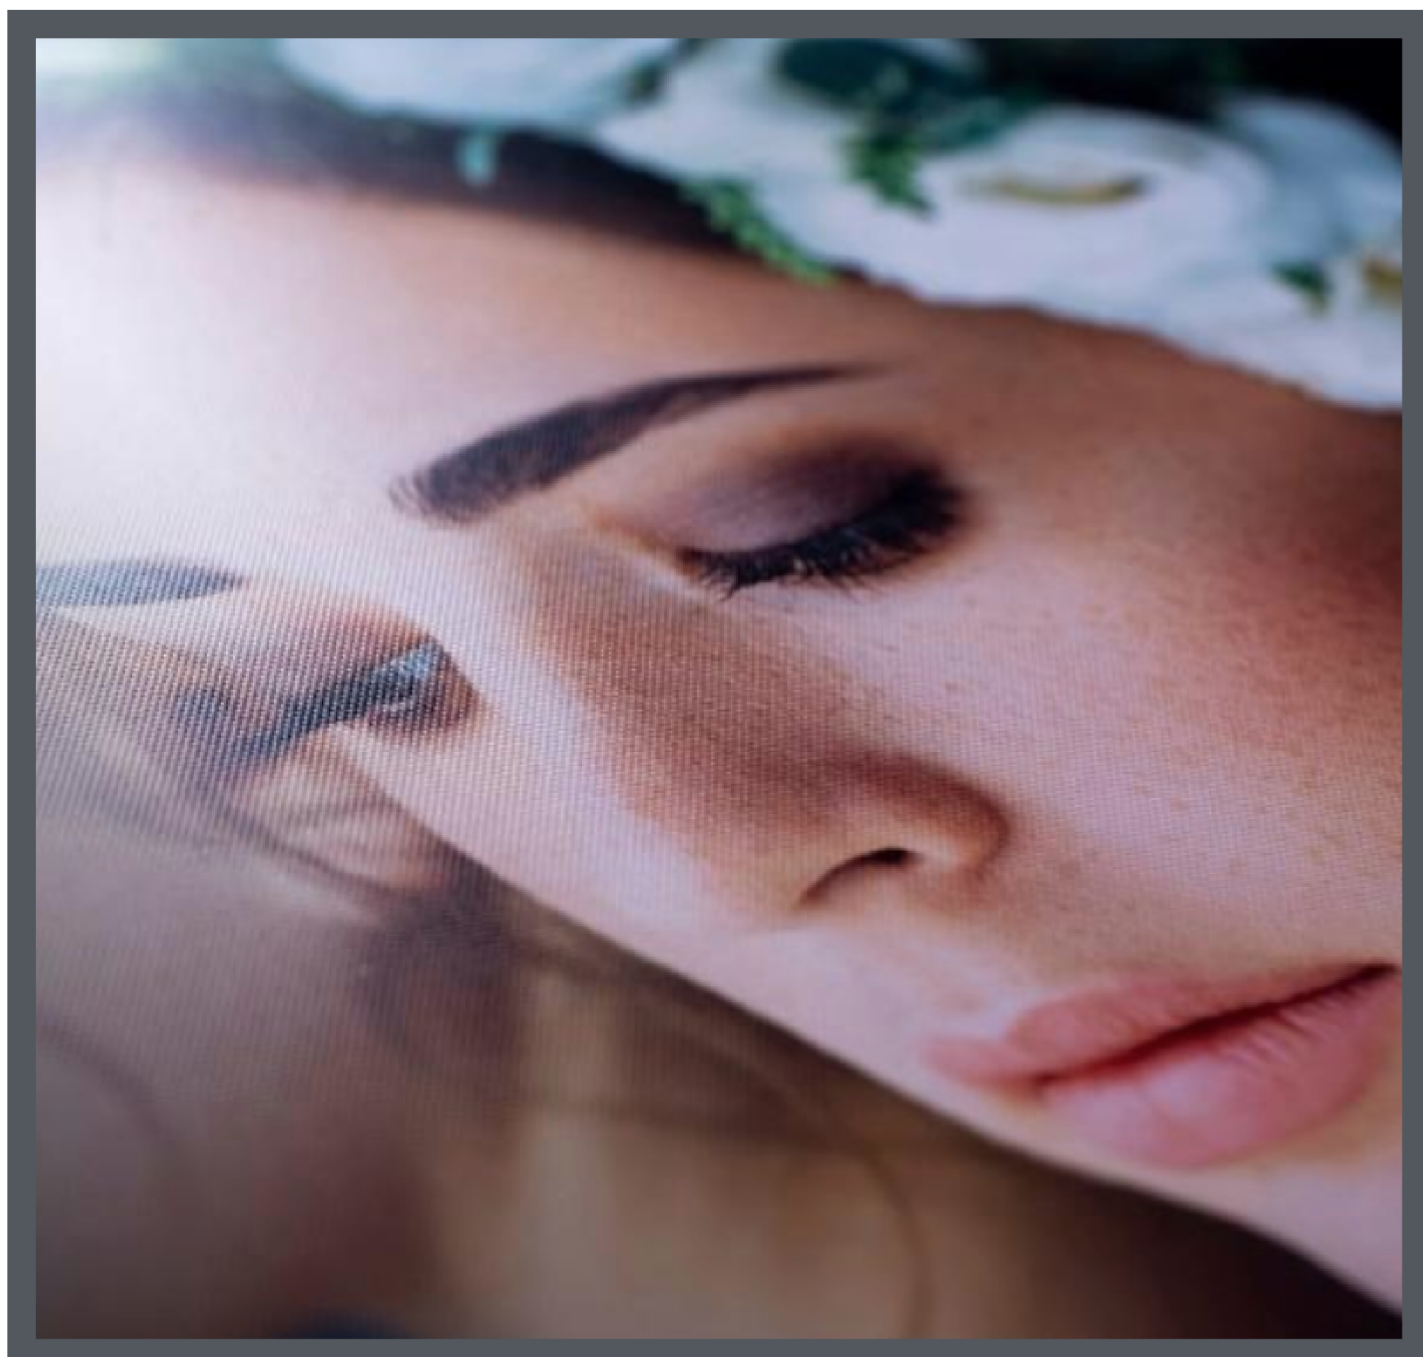

Eggshell

Mohawk Eggshell is a fine art paper created with natural fibres. It combines the tactile feel of uncoated paper with the ink density and sharp detail of coated photo paper. It absorbs light very well. The Mohawk Eggshell 148g is a lightweight paper therefore, some images may slightly show through to the other side.

Metallic Pearl

Previously named Fuji Metallic paper, the Fuji Crystal Archive Digital Paper DPII Pearl is a glossy type paper. Pearl-like crystals give silver halide colour prints a specific luster, creating a distinctive pearl-like appearance. A wide tonal range allows producing prints with rich textured quality. Pearl paper enhances the freshness of images and is an assurance for clearer, more distinct images.

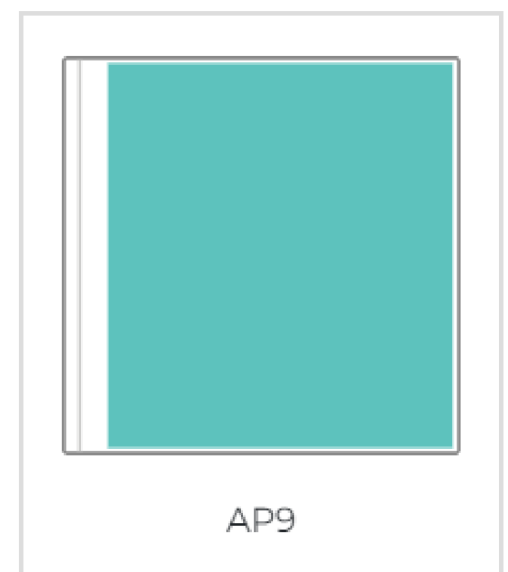

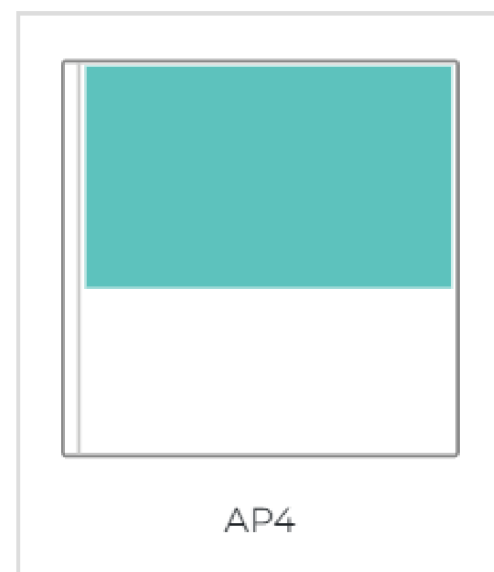

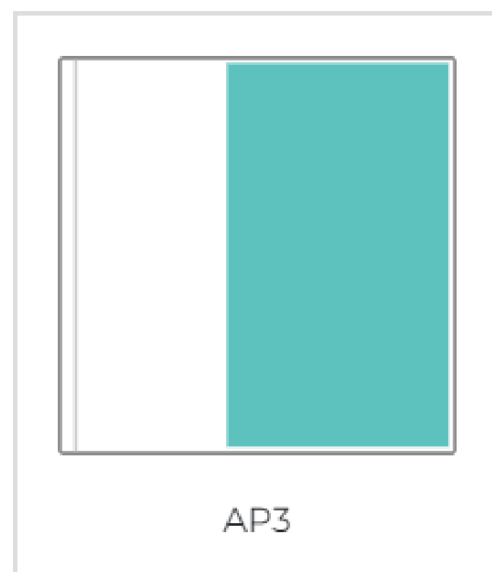

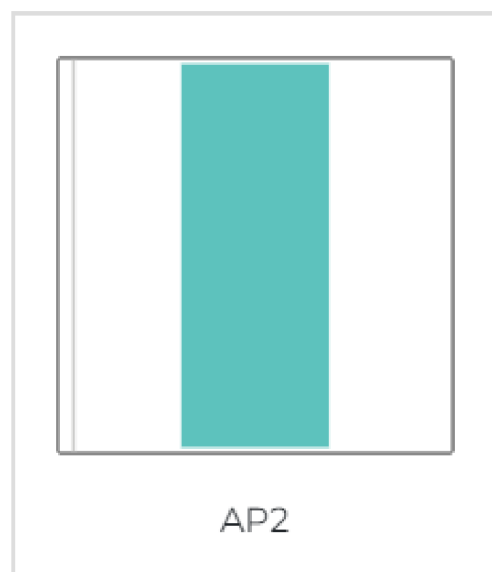

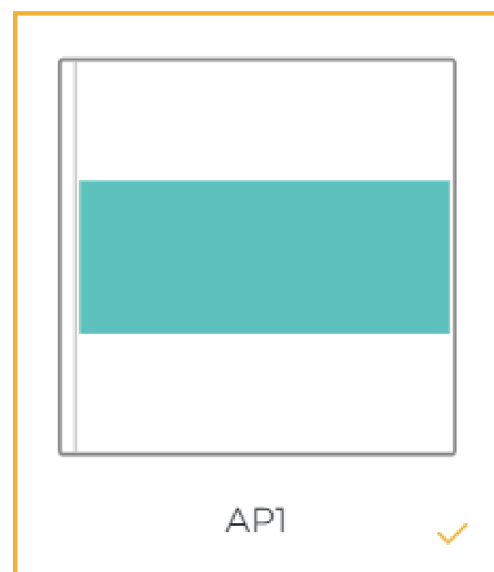

Silk

Fuji Crystal Archive Digital Paper DPII Silk paper is a half-matte paper with a texture resembling that of a fine honeycomb. Very resistant to fingerprints and scratches. Rich colour reproduction. Fuji Silk paper gives your images a soft look, contrastingly to the sharpness provided in glossy papers.

PRINT FINISHES

Lustré

Professional colour paper from the Fuji Crystal Archive range with a semi-matt finish, this paper is coated with a soft, speckled sheen to give a high quality photographic finish with accurate colours throughout. This versatile paper remains our most popular paper option with minimal image interruption across the centre seam, ideal for stunning panoramic shots as it lays completely flat when open.

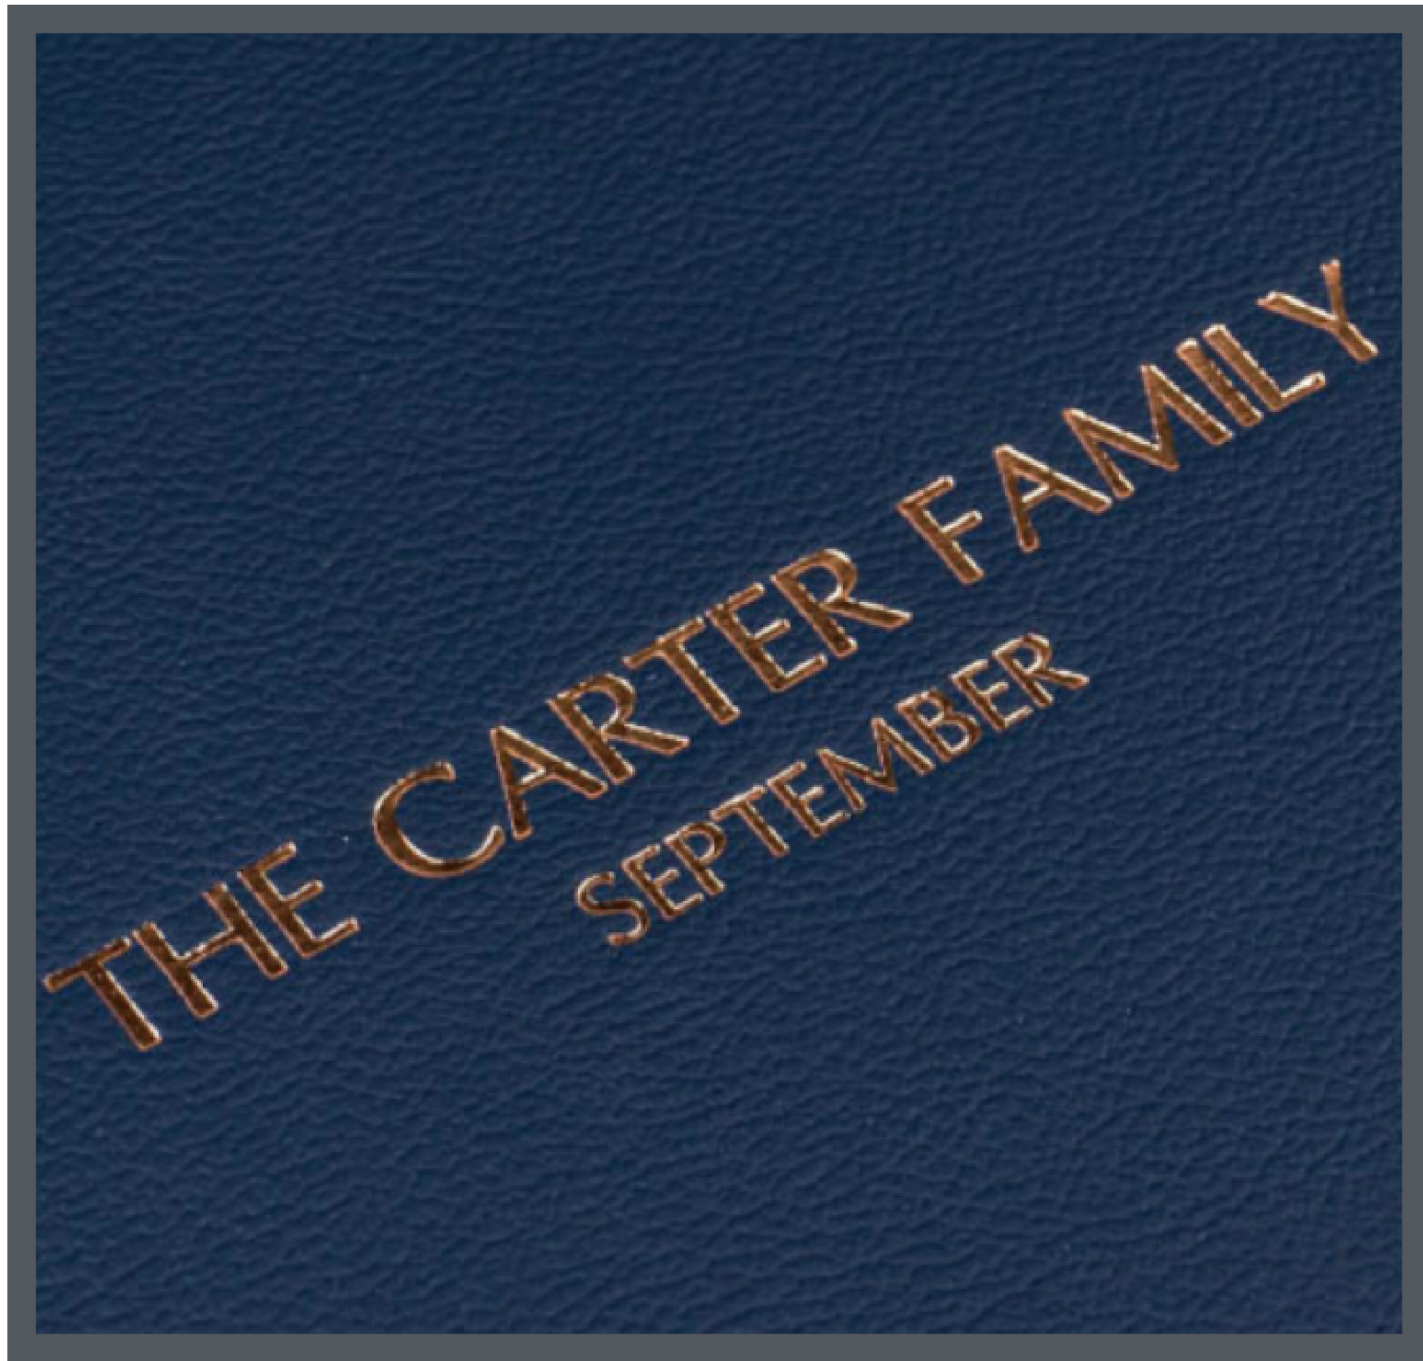

Velvet

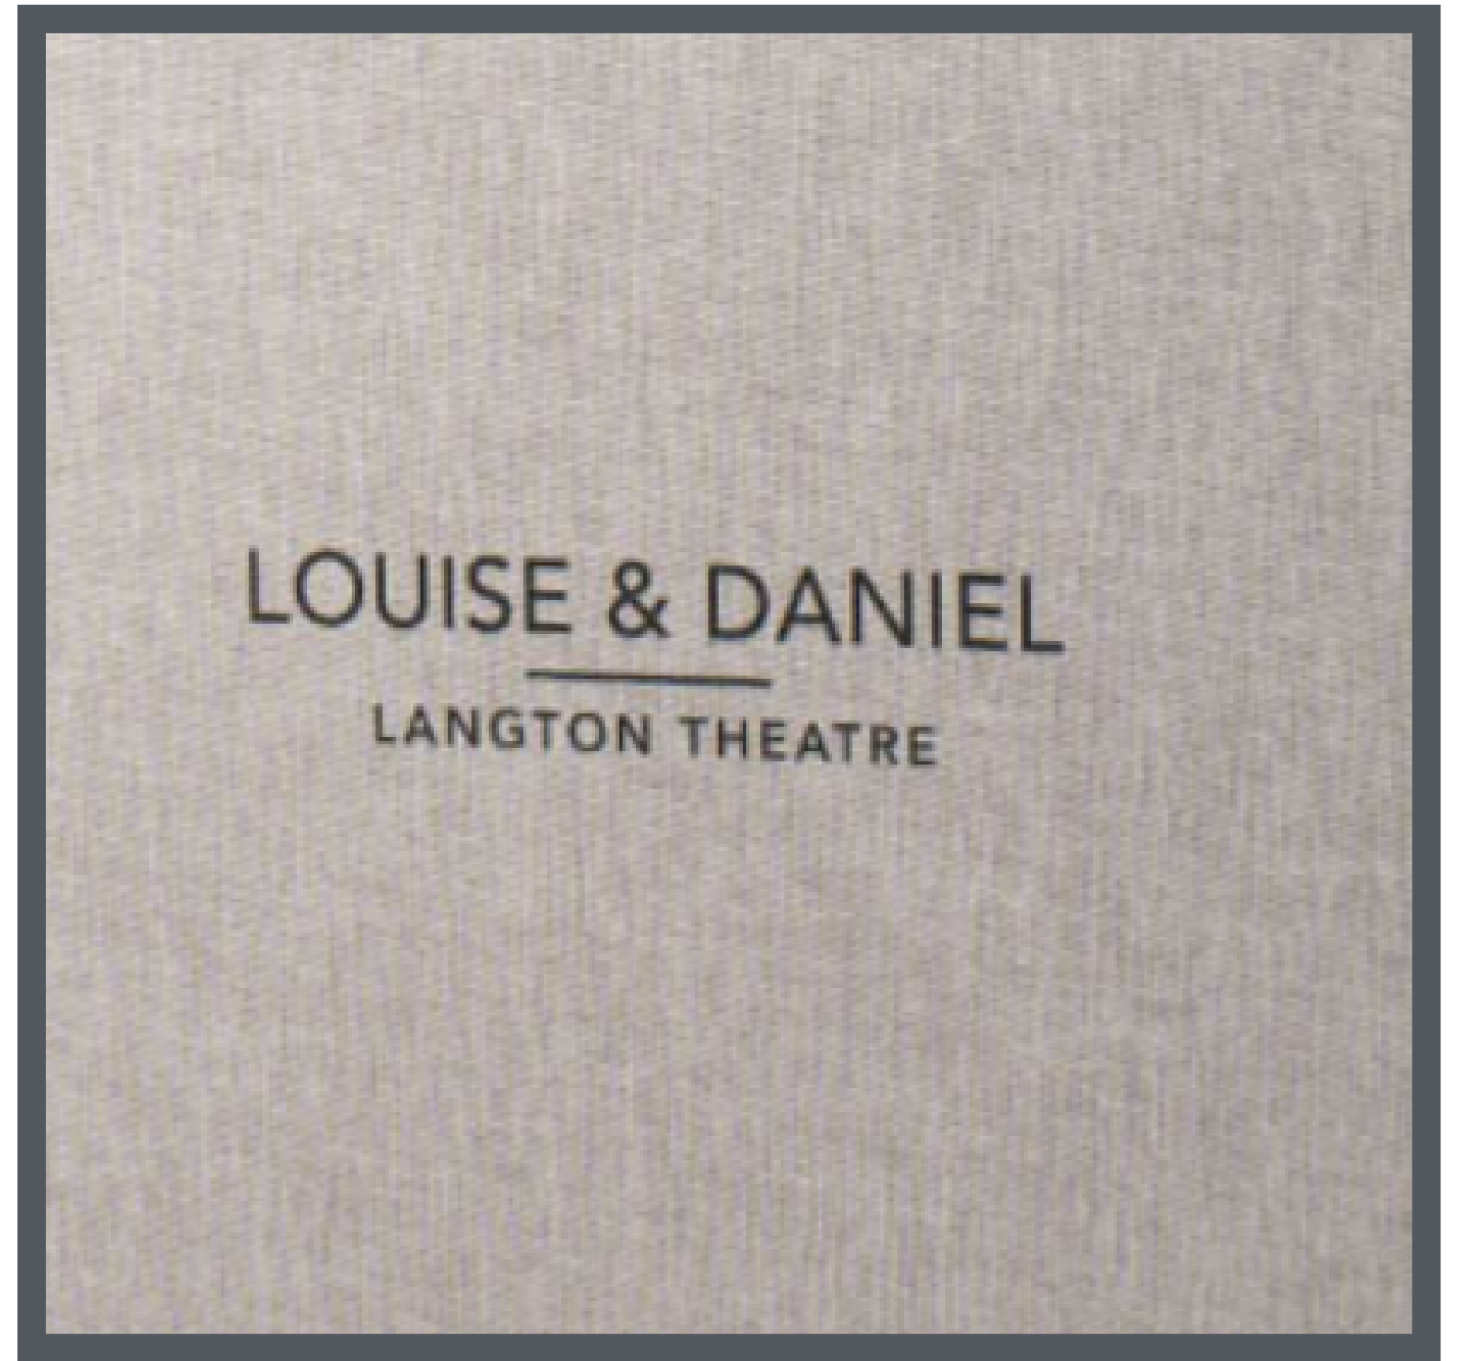

Our crystal archive fuji velvet paper boasts a professional coating with a zero-reflective top layer, creating a stunningly soft and deep-matte effect surface tactile to the touch. This popular paper gives a dusky hue to deep blacks, perfect for vintage effect images. We recommend requesting a free test print if you haven't ordered this paper before.
